-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 August 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Amendment

1. This communication is in response to applicant's amendment filed August 21, 2006.

Claims 1-5 are currently pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art disclosed in page 1 of the specification. Hereinafter, referred to as APA.

With respect to claim 1, APA discloses a method of assigning radio channels to a set of base stations in a wireless network, comprising:

determining a set of radio channels to include all radio channels which said set of base stations have at their disposal for communication (page 1, lines 8-9, wireless local area networks have 13 radio channels at their disposal), and

assigning one radio channel out of said determined set of radio channels to each base station during manufacture of the base stations (page 1, lines 9-10, one of which the base station determines to be used for local area network communication) in such a way that each radio channel in said determined set of radio channels is assigned substantially an equal number of times (page 1, lines 16-17, whereby for example the same radio channel is selected as the default

Art Unit: 2616

value for all base stations. Herein, that same radio channel is assigned substantially an equal number of times).

Allowable Subject Matter

3. Claims 2-5 are allowed.

Response to Arguments

4. Applicant's arguments filed August 21, 2006 have been fully considered but they are not persuasive.

Applicant argues in page 4 that the APA does not disclose assigning one radio channel out of said determined set of radio channels to each base station during manufacture of the base stations in such a way that each radio channel in said determined set of radio channels is assigned substantially an equal number of times as recited in claim 1.

Examiner respectfully disagrees. As recited in lines 5-7 of claim 1 "assigning one radio channel ... to each base station ... in such a way that each radio channel is assigned an equal number of times". Herein, as interpreted by the Examiner, the same radio channel in a set of radio channels is assigned to a number of base stations during manufacture an equal number of times. Herein, claim 1 does not recite that the same radio channel is assigned **to each base station of all the base stations during manufacture**. In other words, radio channel 1 is assigned to a first 5 base stations, then radio channel 2 is assigned to next 5 base stations, radio channel 3 is then assigned to another next 5 base stations. Herein, each radio channel 1, 2, or 3 is assigned an equal number of times, which is 5 times. Therefore, as clearly stated in the rejections of claim 1, the APA disclosed the claimed invention.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
